LITE PAPER
GALAXY FORCE X

INTRODUCTION

Dear our valued players/users/investors!

We are glad to introduce Galaxy Force X to you, the place where you can enjoy a novel gaming experience and earn money at the same time!

Our game development team has years of experience creating world-class games with stunning visuals and addictive gameplay. Over the years, we've been thinking about how to bring more values to our game players. Now, we can realize that goal thanks to blockchain and especially NFT technology. By encoding our in-game characters and items into NFTs and creating a market for them, we are able to give those items real values that our users can benefit from.

Our ambition is to build a leading NFT ecosystem in the blockchain space that delivers sustainable values to our users and investors. The comprehensive ecosystem includes Galaxy Force X - Themed ARCADE SHOOTING GAMES on BSC, the highly-liquid NFT Marketplace, world-class collectibles, and the Galaxy Force X community.
Please kindly read our Lite paper and discover great earning opportunities from Galaxy Force X!
Finally, thank you for being a part of the Galaxy Force X community!

Galaxy Force X Team,

DESIGN GOALS

Galaxy Force X is designed with the following principles:

Ownership of in-game assets

Unlike in regular games where the items and currencies are just mere collectibles, players can actually own the assets they get. The game offers features that allow players to unlock and collect new SHIP and exchange them for real money. By trading, players can increase the value of their in-game assets.

Value of the item collection

Galaxy Force X encourages the players to explore more content of the game while giving them the motivation to complete their collection of different SHIP and SKILL. Players then can build a stronger SQUAD to process further in the story and increase their in-game assets.

Social interaction

The PvP mode allows players to compete with each other in fun yet challenging games. This mode motivates players to collect and upgrade their SHIP to build a stronger Squad, leading to more victories. Besides, the exchange of in-game assets also creates interactions, just like in a real-life economy.

3. GAME MODE

Galaxy Force X is designed so that players can build their Squad of ship in following modes :

• Campaign
• Challenger
• Boss
• PVP battle

4. CAMPAIGN

CAMPAIGN is an activity in which players may collect materials to utilize the power of each ship when joining PVE without having to spend too much time online

Rewards are calculated by the winning map, players can obtain resources including character exp, gfx, treasure, ...

The campaign has 2 levels: Normal and Hard. Each map will finish with 1-3 star

Players use energy points (Energy) to participate in this activity.

5. CHALLENGE

Challenger is an activity in which players may collect materials so much than the Campaign mode.

The more challenger levels pass, the more reward can collect.

6. BOSS

Three times a day, the player can participate in fighting the world boss.

Players will arrange a squad with the most powerful, to participate in the battle with the Boss and receive great rewards.

The reward will be divided based on the amount of damage the player has caused to the boss
